Re: Dioxin/Furan production and fate

Looping in folks. Pls read the string.

Marc - Brian Gullett in CEMM is the right person for this so pls let ORSANCO know Brian is the SME to work with.

Brian's mobile Ex. 6 Personal Privacy (PP)

Kelly - pls let the EOC know about this.

Thanks,
Greg

I am think more a combustion and air deposition person (s). Two principle questions.... I think, I haven't been plugged in until today.

1. Were D/Fs produced and at what yield?

2. If produced, how much would be deposited in the Ohio River and watershed that could be relevant to DW utilities?

Subject: Re: D/F technical inquiry from ORSANCO

Apologies. D/Fs = Dioxins/Furans. D/Fs may be produced during the combustion of vinyl chloride. ORSANCO has been asked about the risk to drinking water from the possible production and deposition of D/Fs into the Ohio River. Richard Harrison (ORSANCO) is looking for a subject matter expert to answer questions in this regard prior to his congressional testimony.

Subject: D/F technical inquiry from ORSANCO

Greg and Tom

While here in San Antonio at an Air Force PFAS meeting, I just received an urgent call from Richard Harrison from ORSANCO. He is being called to testify in Congress next week as to the potential for D/Fs to be deposited in the Ohio River from the burning of VC at the train derailment in Ohio. And potential risks to drinking water and other risk pathways. I have done some work on D/Fs but more focused on sediment remediation and limiting exposure through the food web. I told him I am not the SME regarding generation and deposition of D/Fs but would reach out within EPA.

I am in San Antonio with an OLEM contingent and will check with them at the next break. I am reaching out to you both to provide your suggestions as to ORD resources that may be available for ORSANCO to tap into. They also acknowledged that they have been in touch with Reg 5 with a similar request.

I will be heading the airport shortly but told Richard I would update him tomorrow with any progress on an SME to help ORSANCO.

Thank you
Marc
